
THE EFC FORMULA, 2003-2004

What is the EFC?

The expected family contribution (EFC) is the amount a family can be expected to contribute toward a student's college costs. Financial aid administrators determine an applicant's need for federal student aid from the U.S. Department of Education (the Department) and other non-federal sources of assistance by subtracting the EFC from the student's cost of attendance (COA). The EFC formula is used to determine the EFC and ultimately determine need for assistance from the following types of federal student financial assistance: Federal Pell Grants, subsidized William D. Ford Federal Direct Loans (made under the Direct Loan [DL] Program), subsidized Federal Family Education Loans, and assistance from the "campus-based" programs—Federal Supplemental Educational Opportunity Grants (FSEOG), Federal Perkins Loans, and Federal Work-Study (FWS). The methodology for determining the EFC is found in Part F of Title IV of the Higher Education Act of 1965, as amended (HEA). Updated tables used in the computation of the EFC for the 2003-2004 award year were published in the Federal Register on May 31, 2002.

Financial aid administrators use information from the *Free Application for Federal Student Aid* (FAFSA), including the EFC, to develop a financial aid package. This package specifies the types and amounts of assistance, including non-federal aid, a student will receive to cover his or her education-related expenses or COA. However, because funds are limited, the amount awarded to a student may fall short of the amount of aid for which the student is eligible.

What is the source of data used in EFC calculations?

All data used to calculate a student's EFC comes from the information the student provides on the FAFSA. A student may submit a FAFSA (1) through the Internet by using *FAFSA on the Web*, (2) by filing an application electronically through a school, either through the Department's Electronic Data Exchange (EDE) or FAA Access to CPS Online, or (3) by mailing in a paper FAFSA. Students who applied for federal student aid in the previous award year may be eligible to reapply by filing a Renewal FAFSA over the Internet or by submitting a paper renewal application. Applying for federal aid is free. However, to be considered for non-federal aid (such as institutional aid), a student may have to fill out additional forms and pay a processing fee.

We encourage applicants to complete the appropriate electronic version of the FAFSA rather than a paper FAFSA because electronic versions contain additional instructions and help features, have built-in edits that reduce applicant error, and allow the Department to send application results to students and schools more quickly.

Who processes the application, and how is a student notified of his or her EFC?

The Department's Central Processing System (CPS) receives the student's application data, either electronically or via the paper application, and uses it to calculate an EFC. Once the FAFSA has been processed, the CPS will send the student an output document containing information about his or her application results. This document, which can be paper or electronic, is called a Student Aid Report (SAR). The SAR lists all the information from the student's application and indicates whether or not the application was complete and signed. If it is complete and signed, the SAR will also include the student's EFC. Students are instructed to check carefully the information on the SAR to ensure it is correct. All schools listed on the student's FAFSA will receive application information and processing results in an electronic file called an Institutional Student Information Record (ISIR).

If corrections are necessary, students have several options for making them:

- Students can ask their schools to make electronic corrections for them using FAA Access to CPS Online or through EDE.
- Students with PINs provided by the Department can make corrections using *FAFSA Corrections on the Web*.
- Students who receive SARs in response to their applications can make corrections on the SARs and return them to the address provided.

Which EFC worksheet should be used?

There are three regular (full-data) formulas—(A) for the dependent student, (B) for the independent student **without** dependent(s) other than a spouse, and (C) for the independent student **with** dependent(s) other than a spouse. Also, there are three simplified versions of each formula with fewer data elements.

NOTE: Do NOT complete the shaded areas in the simplified worksheets; asset information is not required in the simplified formulas.

What is the definition of an independent student?

Because the EFC formula for a dependent student uses parental data, while the two formulas for independent students do not, the first step in calculating a student's EFC must be to determine his or her dependency status. For the 2003-2004 award year, a student is automatically determined to be an independent applicant for federal student aid if he or she meets one or more of the following criteria:

- was born before January 1, 1980;
- is a veteran of the U.S. Armed Forces (see the definition in the box below);
- is working on a master's or doctorate program during the school year 2003-2004;
- is married;
- is an orphan or a ward of the court, or **was** a ward of the court until age 18; or
- has legal dependents other than a spouse (see the definition in the box below).

A financial aid administrator can make a documented determination of independence by reason of unusual circumstances, even if the student initially filed as a dependent student.

TERMS USED IN THE DEFINITION OF AN INDEPENDENT STUDENT

VETERAN. A student who (1) has engaged in active service in the U.S. Armed Forces (Army, Navy, Air Force, Marines, or Coast Guard), or has been a member of the National Guard or Reserves who was called to active duty for purposes other than training, or was a cadet or midshipman at one of the service academies, or attended a U.S. military academy preparatory school, and (2) was released under a condition other than dishonorable. A veteran is also a student who does not meet this definition now but will by June 30, 2004.

LEGAL DEPENDENT. Any child of the student who receives more than half support from the student (the child does not have to live with the student), including a biological or adopted child. Also, any person, other than a spouse, who lives with the student and receives more than half of his or her support from the student and will continue to receive more than half support from the student through June 30, 2004.

Which students qualify for the simplified EFC formulas?

The following criteria determine which students may have their EFCs calculated by a simplified formula. Assets are not considered in the simplified EFC formulas.

For the 2003-2004 award year, a **dependent** student qualifies for the simplified EFC formula if **all** of the following are true:

- (1) the student's **parents** filed or are eligible to file a 2002 IRS Form 1040A or 1040EZ (they are not required to file a 2002 Form 1040)¹, or the parents are not required to file any income tax return; **and**
- (2) the **student** filed or is eligible to file a 2002 IRS Form 1040A or 1040EZ (he or she is not required to file a 2002 Form 1040)², or he or she is not required to file any income tax return; **and**
- (3) the 2002 income of the student's **parents** from the two sources below is \$49,999 or less (excluding any income of the dependent student):
 - for tax filers, the parents' adjusted gross income from 2002 Form 1040A or 1040EZ is \$49,999 or less³, **or**
 - for non-tax filers, the income shown on the 2002 W-2 forms of both parents (plus any other earnings from work not included on the W-2s) is \$49,999 or less.

For the 2003-2004 award year, an **independent** student qualifies for the simplified EFC formula if **both** of the following are true:

- (1) the student (and the student's spouse, if any) filed or is eligible to file a 2002 IRS Form 1040A or 1040EZ (he or she is not required to file a 2002 Form 1040)⁴, or he or she is not required to file any income tax return; **and**
- (2) the student's (and spouse's) 2002 income from the two sources below is \$49,999 or less:
 - for tax filers, the student's (and spouse's) adjusted gross income from 2002 Form 1040A or 1040EZ is \$49,999 or less⁵, **or**
 - for non-tax filers, the income shown on the student's (and spouse's) 2002 W-2 forms (plus any other earnings from work not included on the W-2s) is \$49,999 or less.

¹ One of the following 2002 income tax forms may be filed as an alternative to filing a Form 1040A or 1040EZ: the income tax return required by the tax code of the Commonwealth of Puerto Rico, Guam, American Samoa, the U.S. Virgin Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, or Palau.

² See note 1 above.

³ See note 1 above.

⁴ See note 1 above.

⁵ See note 1 above.

Which students automatically qualify for a zero EFC?

Certain students are automatically eligible for a zero EFC. For the 2003-2004 award year, a **dependent student** automatically qualifies for a zero EFC if **both** of the following are true:

- (1) the student **and** parents filed or are eligible to file a 2002 IRS Form 1040A or 1040EZ (they are not required to file a 2002 Form 1040)⁶, or the student **and** parents are not required to file any income tax return; **and**
- (2) the sum of both parents' 2002 adjusted gross incomes is \$15,000 or less, or if the parents are not tax filers, the sum of their earned incomes is \$15,000 or less.⁷

An **independent student with dependents other than a spouse** automatically qualifies for a zero EFC if **both** of the following are true:

- (1) the student (and student's spouse, if any) filed or is eligible to file a 2002 IRS Form 1040A or 1040EZ (he or she is not required to file a 2002 Form 1040)⁸, or the student (and spouse) is not required to file any income tax return; **and**
- (2) the sum of the 2002 adjusted gross income(s) of the student (and spouse) is \$15,000 or less, or if the student (and spouse) are not tax filers, the sum of their earned income(s) is \$15,000 or less.⁹

Note that the automatic eligibility criteria for a zero EFC are not applicable to a single or married **independent student without dependents other than a spouse**.

Why might a calculation of an EFC using these worksheets differ from the EFC reported on a student's SAR?

When it appears that an applicant has reported inconsistent data, the Central Processing System (CPS) may make certain assumptions to resolve the inconsistency. These assumed values, which are reported on the student's SAR, are used to calculate the student's EFC. Therefore, in some cases, the EFC produced by these worksheets may differ from the EFC produced by the CPS if the assumed values are not used.

In addition, to help reconcile worksheet calculations with those of the CPS, all calculations should be carried to three decimal places and then rounded to the nearest whole numbers—round upward for results of .500–.999, round downward for results of .001–.499. Rounding should be performed so that the intermediate value that is the result of each step will not have any decimal digits.

⁶See note 1 on page 4.

⁷This amount is based on the maximum amount of income, rounded to the nearest thousand, that may be earned in order to claim the Internal Revenue Service's "maximum federal earned income credit." The maximum amount of 2002 income that may be earned in order to claim the credit, when rounded to the nearest thousand, equals \$15,000.

Multiply parents' total income (EFC Worksheet A, line 7) by the appropriate rate from the table above to get the "state and other tax allowance" (Worksheet A, line 9). Use the parents' *state of legal residence* (FAFSA/SAR #67). If this item is blank or invalid, use the student's *state of legal residence* (FAFSA/SAR #24). If both items are blank or invalid, use the *state* in the student's mailing address (FAFSA/SAR #6). If all three items are blank or invalid, use the rate for a blank or invalid state above.

Multiply the total income of student (EFC Worksheet A, line 35) by the appropriate rate from the table above to get the "state and other tax allowance" (Worksheet A, line 37). Use the student's *state of legal residence* (FAFSA/SAR #24). If this item is blank or invalid, use the *state* in the student's mailing address (FAFSA/SAR #6). If both items are blank or invalid, use the parents' *state of legal residence* (FAFSA/SAR #67). If all three items are blank or invalid, use the rate for a blank or invalid state above.

***To calculate the EFC for less than 9-month enrollment, see the next page. If the student is enrolled for more than 9 months, use the 9-month EFC (line 28 above).

NOTE: Use this additional page to prorate the EFC only if the student will be enrolled for less than 9 months and only to determine the student's need for campus-based aid, a subsidized Federal Stafford Loan, or a subsidized Federal Direct Stafford/Ford Loan. Do not use this page to prorate the EFC for a Federal Pell Grant. The EFC for the Federal Pell Grant Program is the 9-month EFC used in conjunction with the cost of attendance to determine a Federal Pell Grant award from the Payment or Disbursement Schedule.

Multiply the total income of student and spouse (EFC Formula Worksheet C, line 7) by the appropriate rate from the table above to get the "state and other tax allowance" (regular Worksheet C, line 9). Use the student's *state of legal residence* (FAFSA/SAR #24) reported on the FAFSA. If this item is blank or invalid, use the *state* in the student's mailing address (FAFSA/SAR #6). If both items are blank or invalid, use the rate for blank or invalid state above.

Table C2: Social Security Tax

Calculate separately the Social Security tax of student and spouse.

Income Earned from Work*	Social Security Tax
\$0 - \$84,900	7.65% of income
\$84,901 or greater	\$6,494.85 + 1.45% of amount over \$84,900

*Student's 2002 income earned from work is FAFSA/SAR #42.
 Spouse's 2002 income earned from work is FAFSA/SAR #43.
 Social Security tax will never be less than zero.
